

# BUILD YOUR LEGACY

*What will your legacy be?*

## **THE GIFT OF YOUR LIFETIME:**

For most of us, a planned gift is the largest and therefore the most impactful gift of our lifetime. Make your name, or the name of someone you love, into a lasting memorial... a salute to the past AND a gift to the future.

I will make you proud

*I am the first person in my family to have earned a college degree and will be the first doctor in my family. Thank you for being a part of my support team. I will make you proud.*

*- Dr. SchMiyah Smith*

Even after your lifetime, your planned gift can continue to support our shared mission of building the next generation of health care leaders.

Thank you for considering  
**A PLANNED GIFT**

**We are here to help!**

**NATIONAL MEDICAL  
FELLOWSHIPS**

**GIVE A GIFT  
THAT WILL CHANGE LIVES**

**NATIONAL MEDICAL  
FELLOWSHIPS**

# 1 DESIGN

*Your Gift*

## ***Crafting your gift***

Transform your resources, such as your financial, personal and real assets into opportunity for students.

Here are some of the more common ways that you may make a planned gift:

**Bequest:** Make a gift after your lifetime through your will or trust. This can be a fixed dollar amount, a specific asset, or a percentage of your estate.

**Retirement Account:** This can be the most heavily taxed asset in many estates. Choosing this as your gift might leave your less tax-burdened assets to your loved ones.

**Endowed Named Scholarship:** A perpetual fund can be set up to generate a scholarship to help support a deserving student's education each year.

# 2 IMPACT

*The Future*

## ***Your values will endure***

*...through a planned gift to  
National Medical Fellowships*

**Your generous  
gifts ensure a  
bright future for  
countless  
students.**

Whether you include NMF in your will or establish an endowed scholarship, you will be investing in this 72-year-old institution, which has already changed the lives of more than 30,000 alumni across the country, those who had limited resources but a big dream, a dream like yours.

Help us continue our mission by helping a host of students. Your gift will be a gift of healthy tomorrows for so many.

# 3 TEACH

*Generosity*

## ***Magnify the power of your gift***

When you are a leader, people watch what you do. Your planned gift teaches others to re-deploy the resources they have to lift up others - during their lifetimes and after.

### **Share the news of your gift with:**

**Your loved ones** so that they can witness your leadership, even beyond your lifetime — and follow your example to plan their own legacy for the future.

**National Medical Fellowships** so that we can be in conversation with you and ensure that your future intentions are honored.

## **Caring for estates and assets often requires expert advice.**

In order to make sure a particular planned gift fits your situation, we suggest that you **consult with your professional advisor** on how this gift would fit into your plans.

BY 2025 the US will face a shortage of between 61,700 and 94,500 physicians...

**...unless they get their chance.**

## **Join the Legacy Society**

National Medical Fellowships introduced the Legacy Society to recognize individuals or families who have named NMF as a beneficiary in their will, trust life insurance policy or other estate-related gift plan.
